AUM SRI SAI RAM

**Dr. E. Prabhu. M.D., (Internal Medicine), DRM., FRCP (Glasg), F.I.C.P.,  
Medical Director**

Date – 24<sup>th</sup> June, 2016

### To Whom So Ever It May Concern

This is to certify that **YLC 1002 – Needle Sterlizer & Disposal System** is a very useful equipment for safe disposal of syringe needles, without directly removing it from used syringes. It destroys the needle fully by twisting it and thereby preventing every possibility of being reused, unlike the needle cutters. I found it to be safe for use in our daily clinical practice – even by untrained staff. I would congratulate Ms. Arka Multitech Pvt. Ltd., Chennai for bringing our such a useful, simple and innovative medical device. I wish them all the best in their future endeavors.

(Dr. E. PRABHU)
